

Divine Indwelling:

Mystical Oneness and Global Diversity

Date and Time, Your Church or Center

“Peace in the world will become reality when individuals realize that we belong to each other, that there is but one human and planetary family.”
- One Voice (film)

In this class, we will look at the questions that we all wonder about:

- **What is the meaning of life and love?**
- **Does God exist?**
- **What is the path to spiritual awakening?**
- **What is the way to inner peace and to true peace in the world?**

We will explore a deep unifying current often hidden within all traditions: the path of the mystic. It is a path that offers hope, compassion, transformation, respect for scientific discovery, and beauty.

Art, film, poetry, and discussion will help us to explore the

interconnectedness-of-all-life and how this awareness can enliven our own spiritual experience. The compelling draw to mysticism comes from the deepest yearning of the human heart and may be a part of our evolutionary unfolding.

Jean Frinak, M.Div, M.F.T., a therapist and teacher based in Seattle, will lead these classes.
